Professional Summary

Motivated software developer with experience in software integration and enterprise application development. Skilled in building and maintaining integration flows, backend services, and database-driven applications using Java, Spring Boot, SQL Server, and IBM App Connect. Proficient in full stack development, including Angular and front-end technologies, with hands-on experience in message-driven systems using IBM MQ. Experienced in deploying applications on cloud platforms and managing version control with GitLab. Strong problem-solving skills, with a focus on reliable and efficient system operation. Eager to contribute to complex integration projects and continuously expand technical expertise.

Professional Experience

Integral Ways (Remote)   March 2023 - Feb 2024
Web Developer.

- Developed and maintained web applications using Angular, managing application state with NGXS.
- Integrated front-end with back-end services to fetch data, submit forms, and implement authentication flows.
- Developed backend services for authentication using OAuth2 and JWT.
- Supported the development of mobile applications using Ionic.
- Worked with ApexCharts to visualize data effectively.
- Built responsive blog templates for optimal user experience across devices.
- Used Jira and Confluence to track work progress and maintain technical documentation.

Eskadenia Software   July 2023 - August 2023
Java Development Internship.

- Refreshed my understanding of Object-Oriented Programming (OOP), solidifying my foundation in this essential concept.
- Gained valuable insights into the Collections framework, enhancing my ability to manage and manipulate data effectively.
- Explored network protocols like Telnet, Sockets, and FTP, broadening my knowledge of communication methods in the digital Realm.
- Took on the exciting challenge of implementing a program for FTP, enabling seamless uploading and downloading of files from servers.

Inspire Software Solutions (Full Time)   Oct 2024 – Now
Software Developer.

- Worked as an Integration Developer on enterprise applications for the Work Permits module.
- Developed and maintained integration flows and scheduled tasks for work permit processing and calculations.
- Integrated systems with payment and billing platforms to generate invoices and manage transactions.
- Designed and consumed SQL Server stored procedures to implement complex business logic and data transformations.
- Managed version control using GitLab and deployed applications on OpenShift.
- Worked with IBM MQ for reliable messaging and asynchronous communication between systems.

- Performed troubleshooting and debugging across message flows, backend integrations, and database interactions.
- Applied critical thinking and problem-solving to ensure reliable and efficient system operation.

Education

Bachelor's in computer information systems September 2020 - June 2024
University Of Jordan at Amman
Rating: (very good) with an average of (3.27).

Key Skills

Frontend development

- HTML5, CSS, SCSS, JavaScript, TypeScript, Angular, RxJS, NgRx, Tailwind, Bootstrap, FontAwesome

Backend development:

- Java, Spring Boot, Firebase, IBM App Connect, IBM API Connect, IBM MQ

Cloud & Platforms:

- Google Cloud Platform (GCP), Openshift, ELK Stack

Databases:

- MySQL, SQL Server

Development Tools:

- VS Code, IntelliJ IDEA, Git, Git Extensions, npm, Maven

Collaboration Tools:

- Jira, Slack

Languages

Arabic (native)

English (Very good)
